- Group 3: —, spanish_text.docx

STEP 1: Text Translations

Translate the text files with MS Word and Google Docs

1. Google Docs: [in-doc translation](#) (create a new google doc, cut-and-paste the text into the Google Doc, save it, and translate)
2. MS Word: [in-doc translation](#)

STEP 2: Save

Save the translations in your Google Drive in a folder called “class_translations” with the following file names and formats:

1. MS Word: .txt file: MSWord_[original language]_to_english.txt
2. Google: new GoogleDoc: google_[original language]_to_english

STEP 3: Compare

1. Paste the translations into the Text Comparison Website <https://www.diffchecker.com/diff>. Note that you may have to adjust the spacing in the text files to make the text align.

STEP 4: Discuss

1. Are there any differences in the way key words or concepts were translated?
2. Are there circumstances under which these could influence the interpretation of the writer’s intent? Subtleties of language like formality of tense, tone, or meaning?
3. Do any of them seem “better” or “more accurate”?
